教育活動

教育実践上の主な業績		年月日	概要
1 教育内容・方法の工夫（授業評価等を含む）			
1	Teaching aims		This depends very much on the specific course being taught, but overall, I believe language to be a skill/tool that needs motivation, comprehension, and practice to master. Aims, therefore usually reflect these points.
2	Teaching approach & methodology		Again, this is dependent on the specific course being taught, but also the course goals and the student needs. No two classes are alike, and therefore approach and methodology must be adapted as necessary to meet the above points.
3	Teaching materials		Teaching materials are selected based on the course goals as well as student needs and levels. Thus, I find myself often making class materials rather than simply using a commercial textbook, as I can best meet the above goals in this way. More work for myself, but a more rewarding and fulfilling class for the students.
4	Course grading		Grading is carried out based on fulfillment of the course goals previously announced to the students. This may include tests, quizzes, assignments, and in class participation (and therefore attendance). I believe this type of continuous assessment to be most fair.
2 作成した教科書、教材、参考書			
1	Reading Strategies III & IV teaching materials		Most of the materials used in this course are of my own making, derived from online and other sources, to which I develop associated exercises and activities.
2	English Language Methods Ⅱ＆Ⅲ teaching materials		Associated exercises and activities created based on each chapter of the reading novel used in class.
3 教育方法・教育実践に関する発表、講演等			
1	Teaching Workshops		Several teaching workshops on the use of Internet resources in language education
4 その他教育活動上特記すべき事項			
1	ED-MEDIA Int'l Conferences, ELEARN Int'l Conferences, JALT Int'l Conferences, JALTCALL Int'l Conferences, and other Int'l Conferences		Numerous paper presentations dealing with aspects of apply technology to education in general and English language education in specific.

学会等および社会における主な活動（学外の委員、役職等）

年月日	活動内容
2006年4月～現在	Association for the Advancement of Computing in Education（AACE）
